## **4.4KVA PORTABLE GENERATORS INSTRUCTIONS**

Dear Customers,

Hi

Thanks for purchasing this great portable unit for all your camping power needs.

Please note that owners need to perform a complete run in on the generator before the generator can reach its peak performance.

This can be done by running through 4 tank of fuel. Please also have appliances plug in to the generator when its running in. Customers can usually notice that generator works perfect after just 2 tanks of fuel. I hope that you can try this out and also make sure the economy switch is off if you are running higher power tools.

Please be aware of the power consumption of the tools you are running too as generator will not be able to function normally if the appliance is drawing more power than what the generator can produce. Generally, the max wattage a generator can produce is 0.8 of the maximum rated KVA.

I hope this information can come in helpful. We look forward for your reply regarding any dramas.

All the best

Mick Ryan

## DESCRIPTION

GenTrax has always been one of the most competitive manufacturers in the Inverter Generator market. They have recently introduced the **latest and most innovative** machine ever made yet; GenTrax **HD4400**. This machine satisfies your needs of **240v** power when you are out and about. **Pure Sine Wave** technology makes it possible to run sensitive equipment like laptops and microwaves. Also comes with **12v** outlet and a **free DC cable** for 12v appliances and battery charging options. These are all the basic feature of the GenTrax HD4400. However, GenTrax had made some changes and improvement to the already perfect machine, continue reading to find out the improvement GenTrax has achieved in its **2013 model**.

### Lowest noise

Check out our hottest 2013 model HD4400 Pure Sine Wave Inverter Generator. Our upgraded model uses the latest technology that ensure the machine puts out the lowest noise compare to other similar Generator in the market. Noise rating of 58dB from 5 Meters makes you forget that it is running at the back.

### Low Fuel Consumption

Equip with latest fuel saving technology make it possible to run more than 10 Hours on a single tank on economy mode.

### Compact Design

Introducing the most compact design ever model ever built by GenTrax thanks to more than 15 years of Nanotech research. The 2013 HD4400 have a lighter and slimmer inverter put into it which make it so compact and light compare to the past model.

- **Max AC output:** 4.4KVA @  $\cos 0.8$
- **Rated AC output:** 3.5KVA @ 0.8  $\cos$
- **Rated Voltage:** 240V
- **DC output Voltage:** 12V
- **DC output Current:** 8A
- **AC outlet:** Double
- **DC outlet:** single 'T' Type
- **Dimension:** 565 x 320 x 470
- **Weight:** 28kg

### Engine Specs

- **Model:** MM4500Y13
- **Type:** Air-cooled, 4 cycle, OHV, Gasoline Engine
- **Displacement:** 149cc
- **Engine Speed:** 5500rpm
- **Ignition Mode:** T.C.I
- **Fuel Type:** Regular Unleaded
- **Fuel Capacity:** 5.1 liters
- **Oil Type:** SAE 10W30
- **Oil Capacity:** 1.0 Liter
- **Spark Plug:** A7RTC or CR5HSB (NGK)
- **Noise Level:** 58dB/4m

### Product ideal of running:

- Coffee Machine
- Power Tools
- Caravan/Motorhome Air conditioner
- Kettle
- Camping Fridge
- Cooktop
- Battery Charger
- Laptop
- Toaster
- Microwave

### WARRANTY

We offer a 12 month warranty on all products used for private household use from the date of purchase. In line with most major machinery brands, the use of products for commercial purposes qualifies the purchaser to a 3 month warranty period.

## DESCRIPTION

### Genpower 4.4kVa digital Inverter Generator

- 100% Pure Sine Output - The same as your household supply!
- Australian approved dual weather proof 240v 15Amp outlets
- Powers everything including sensitive electronics 100% safe!
- 12V DC 8.3Amp Outlet including BONUS battery charging leads
- Digital overload / tip over protection
- 5.7 Litre fuel capacity with 5 hrs continuous running time
- Economy mode - Save fuel on light loads
- Super Easy Recoil Start
- 2 Minute Service / Oil Change
- Super Quiet - only 58Db@7m
- SGS and Australian C-Tick Approvals

### Overview

The original GenPower4400i Inverter Generator is everything you need when it comes to portable, pure sine power output.

This range topping 2012 4400i Series is powered by an advanced 150cc over head Cam 4 stroke engine providing a maximum 3500 Watt output while easily maintaining 3000 Watts; this ultra compact unit is capable of powering all your appliances in your caravan/camp-site with PURE SINE power equivalent to that of your household supply including toasters, frying pans and kettles - EVEN THE AIR CONDITIONER and includes a convenient economy mode to save fuel cost for small loads such as computer games or chargers.

Jam packed with impressive features, such as Dual Australian approved 240V 15Amp outlets, 12V 8.3Amp power output, 5.7 Litre fuel capacity and digital overload protection for peace of mind; the MTM 4400i Inverter Generator can run for hours on a single fill.

Be the envy of all on your next holiday or keep your MTM Inverter Generator on hand for work or power outages. Whichever the application, we're sure your MTM4400i is guaranteed to be the unit still powering on in years to come and likewise includes a full 12 months warranty. Purchase today for the ultimate in pure sine wave clean energy output.

## PRODUCT DESIGN AND SET UP

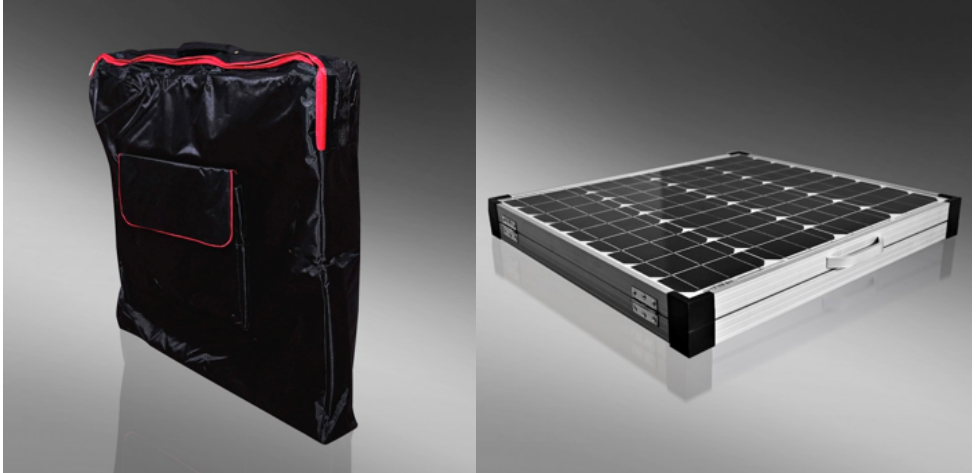

Don't know how solar works? No problem. Check out our easy to use 120W complete portable kit. No knowledge of solar panel is required to use this product. This kit is completely wired up ready to use. Solar panels made by Maxray – one of the top solar panels manufacturers in the world. Solar panel used are Grade A Monocrystalline Cells which are the most efficient in the market. Pairing with the battery charger, this unit will charge your battery using its PWM technology. Solar regulator charges through 3 stage charging cycle, protecting your battery and extend the life of your battery by at least 20%.

This kit comprises of 2 x 60W solar panels, battery charger (regulator), 5 meter of cables with alligator clips. Installation is completed and all you need to do is hook the clips onto your battery for the panel to start doing its job. Buy now and receive a free protection case. Carry bag protect solar panels while travelling preventing it from being damage.

Being built to the highest standard, this solar kit is waterproof. Product is safe to be left out in the rain or be use on a boat. Solar kit also comes with adjustable leg to help catching the best angle for sunlight. Legs are fully adjustable and come with wing nut for easy locking at different angle. Easy locking system allows stands to be locked, preventing it from wobbling and falling during windy days.

**MickeyBLU**  
AUSTRALIA

You won't go wrong with Maxray. Being in the industry for decades, Maxray only produce the highest quality product. Frame is made from Anodized aluminium ensuring the product to last for years and prevent any rust. Each corner of the products had protectors fitted to it to protect the solar panel while in transit in car or boat. Maxray uses anti-reflective glass to maximise exposure of sunlight to the solar cells. Further enhance with Black-Surface-Field structure, conversion efficiency of this unit is second to none. Tempered glass being used protects the solar cell from damages caused by hail. Each model had been tested with steel ball falling from 1m high. To top it all, the solar panels are back by 25-year warranty giving you piece of mind.

### **Warranty on solar panels.**

Solar Panel purchased from MickeyBlu Australia has a 25 years 70% power warranty. MickeyBlu Australia will replace with a new unit if solar panel is tested to be performing less than 70% of rated output. Warranty only stand if solar panel frame is still in original condition where solar frame is not bended or broken and tempered glass is not smash. Regulator included in the package comes with a 6 months warranty. Please contact our customer service through our contact **0438 929 894**.

## Features

- Grade A monocrystalline Cells – solar panels by Maxray
- PWM Charging cycle – 3 stage battery life extender
- Waterproof protective carry case
- Plastic corners – protection against shock
- 5m cables with alligator clips
- Hail resistant tempered glass
- Output guaranteed
- 100% ready to use
- 2013 latest model
- Improved sturdy stand to withstand strong wind
- Anti-reflective glass
- Prevent reverse charge at night
- Meeting highest international standards: ISO 9001 and ISO14001 and certified with TUV, IEC61215, IEC61730, CE and UL
- Shade tolerant
